THE ART OF LIGHTSCAPING

CopperMoon®

BULLET □ ACCENT □ IN-GROUND □ UNDERWATER □ PATH LIGHTS
CopperMoon® was one of the original manufacturers of copper landscape lighting and has been in business for 33 years as a leading manufacturer of premium landscape lighting products.

To support our substantial growth, we purchased a 35,000 sq ft. facility in the Historical District of downtown West Point, GA. We are fortunate to provide manufacturing jobs here in the United States vs completely relying on the overseas markets as is commonplace in our industry.

We have a heritage of product quality and commitment to our customers. We look forward to sharing with you our entire line of copper and brass outdoor lighting fixtures.

Let us beautify your day and illuminate your night with CopperMoon® Premium Landscape Lighting Products.

Area Lights

**CM.885**
Shown in Antique Finish

Die cast brass fixture with stronger light output. Excellent for accenting walls, signs and facades. 12 volt with (2) MR-16’s, accumulated 100 watt maximum per fixture. LED compatible.

Size:
8-1/2” W x 3” L

**CM.890**
Shown in Natural Finish

Die Cast Brass with fish scale reflector shield and external eyebrow to minimize exposure to the light source. Excellent for accenting walls, signs and facades. 12 volt JC bi-pin, 50 watt maximum. LED compatible.

Size:
5-7/8” W x 6” L

**CM.895**
Shown in Dark Antique Finish

Die Cast Brass. Fish scale reflector shield and external eyebrow to minimize exposure to the light source. Excellent for accenting walls, signs and facades. Smaller version on CM.890. 12 volt JC bi-pin, 35 watt maximum. LED compatible.

Size:
4” W x 4-3/8” L

Architectural and commercial grade die cast brass cap light. Excellent for use on steps, decks, stairways, under walls and other low mount conditions. Available with optional mounting bracket. 12 volt with JC bi-pin, 20 watt maximum. LED compatible.

Size: 1-7/16” W x 5-7/8” L

Professional grade copper square post light used to accent steps, decks, stairways and other low mount conditions. Larger version of CM.815. 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 2-3/8” W x 3-1/2” L

Architectural die cast brass cap light with a frosted lens and optional flush or “L” shape stainless steel mounting plate. Excellent for lighting decks, stairways, accenting walls, and other low mount areas. 12 volt, JC Bi-Pin or Light Bar, 20 watt maximum. LED Compatible.

Size: 1-1/4” W x 6-3/4” L

Professional grade copper square post light used to accent steps, decks, stairways and other low mount conditions. Larger version of CM.815. 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 1-1/2” W x 3-1/2” L
Architectural grade copper half bell light designed for accenting decks, stairways, walls and other low mounting conditions. 12 volt Mini-Wedge, 18 watt maximum. LED compatible.

**Size:**
3-1/2" W x 2-1/8" H

**CM.825**
Shown in Natural Finish

Architectural grade lite commercial die cast brass. Half bell design for use on decks, stairways, accenting walls and other low mounting conditions. Available in antique finish ONLY. 12 volt JC bi-pin, 10 watt maximum. LED compatible.

**Size:**
3-3/4" W x 3-3/4" H

**CM.830A**
Shown in Antique Finish

Architectural and commercial grade die cast brass. Excellent for use on decks, stairways, accenting walls and other low mount conditions. Frosted lens for a soft and diffused light output. 12 volt JC bi-pin, 35 watt maximum. LED compatible.

**Size:**
6-3/8" W x 3-3/4" H

**CM.835A**
Shown in Antique Finish

Architectural grade lite commercial die cast brass. Louvered design for use on decks, stairways, accenting walls and other low mount conditions. Available in antique finish ONLY. 12 volt JC bi-pin, 10 watt maximum. LED compatible.

**Size:**
3-3/4" W x 3-3/4" H

**CM.840**
Shown in Rust Finish

Architectural and commercial grade die cast brass. Excellent for use on decks, stairways, accenting walls and other low mount conditions. Frosted lens for a soft and diffused light output. 12 volt JC bi-pin, 35 watt maximum. LED compatible.

**Size:**
5-1/8" L x 3" H

**CM.845**
Shown in Dark Antique Finish

Architectural and commercial grade die cast brass. Excellent for use on decks, stairways, accenting walls and other low mount conditions. 12 volt JC bi-pin, 35 watt maximum. LED compatible.

**Size:**
5-1/8" L x 3" H

**CM.850**
Shown in Black Finish

Architectural grade die cast brass. Excellent for use on decks, stairways, accenting walls and other low mount conditions. Frosted lens for a soft and diffused light output. 12 volt JC bi-pin, 35 watt maximum. LED compatible.

**Size:**
5-1/8" L x 3" H

**CM.860**
Shown in Black Finish

Adjustable architectural grade copper fixture. Copper 2.5” top 180 degree backing that shields the light on one side. 16” x 1” Copper Stem (CM.500/16) OR 20” x 1” Copper Stem (CM.500/20). 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 2-1/2” W x 19-15/16” H OR 23-15/16” H

Adjustable architectural grade copper fixture. Rectangular brass swivel head allows focusing light output in desired location. Perfect for use on application of pathways, garden beds or other architectural features. 20” x 3/4” Copper Stem. 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 2-1/2” W x 24” H

Adjustable architectural grade copper fixture that may be used to provide a light source for pathways and garden beds. Copper 6” top allows flexibility to illuminate an area from approximately 5’ to 14’ in diameter. 20” x 1” Twisted Rope Copper Stem. 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 6” W x 24-3/4” H

Adjustable architectural grade copper fixture. Copper 3 1/2” top allows illumination from approximately 3’ to 10’ in diameter. 16” x 1” Copper Stem (CM.300/16) OR 20” x 1” Copper Stem (CM.300/20). 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 3-1/2” W x 19-1/4”H OR 23-1/4” H

Adjustable architectural grade copper fixture. 6” top allows illumination approximately 5’ to 14’ in diameter. 16” x 1” Copper Stem (CM.700/16) OR 20” x 1” Copper Stem (CM.700/20). 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 6” W x 20-3/4” H OR 24-3/4” H

Visit www.coppermoon.com for details on all CopperMoon® products
Path Lights

Adjustable architectural grade copper fixture that may be used to provide a light source for pathways and garden beds. Copper 4.25” top allows flexibility to illuminate an area from approximately 4’ to 8’ in diameter. 15” X 3/4” Copper Stem. 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 4.25" W x 17-9/16" H

Adjustable architectural grade copper fixture. Copper 9” top allows flexibility to illuminate approximately 14’ to 18’ in diameter. 16” x 1” Copper Stem (CM.730/16) OR 20” x 1” Copper Stem (CM.730/20). 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 9” W x 21” H OR 25” H

Adjustable architectural grade copper fixture that may be used to provide a light source for pathways and garden beds. Copper 6” top allows flexibility to illuminate an area from approximately 5’ to 14’ in diameter. 15” X 3/4” Copper Stem. 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 6” W x 17-9/16” H

Adjustable architectural grade copper fixture that may be used to provide a light source for pathways and garden beds. Copper 11” top allows flexibility to illuminate approximately 6’ to 20’ in diameter. 20” x 1” Twisted Rope Copper Stem. 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 11” W x 25-1/2” H

Adjustable architectural grade copper fixture that may be used to provide a light source for pathways and garden beds. Copper 9” top allows flexibility to illuminate an area from approximately 14’ to 18’ in diameter. 20” x 1” Twisted Rope Copper Stem. 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 9” W x 25” H

Adjustable architectural grade copper fixture. Copper 11” tops allows flexibility to illuminate an area from approximately 14’ to 18’ in diameter. 20” x 1” Copper Stem. 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 11” W x 25-1/2” H

Adjustable architectural grade copper fixture. Copper 11” tops allows flexibility to illuminate an area from approximately 14’ to 18’ in diameter. 20” x 1” Copper Stem. 12 volt JC bi-pin, 20 watt maximum. LED compatible.

Size: 11” W x 25-1/2” H
Specialty Lights

Professional grade brass with 180 degree eyebrow.
Diminutive fixture that provides small accentual lighting from soffits or other small areas.
12 volt MR-8, 10 watt maximum or JC bi-pin/MR-11, 20 watt maximum.
LED compatible.

Size:
1-7/8” W x 3-3/16” L

CM.340
Shown in Dark Antique Finish

Professional grade brass with flush ring.
Diminutive fixture that provides small accentual lighting from soffits or other small areas.
12 volt MR-8, 10 watt maximum or JC bi-pin/MR-11, 20 watt maximum.
LED compatible.

Size:
1-7/8” W x 2-5/8” L

CM.340-R
Shown in Natural Finish

Professional grade copper and brass.
Machined c-clip to hold optional lens. Hanging pendant light with simplistic styling and clean lines to bring illumination and character to outdoor décor.
12 volt MR-16, 50 watt maximum.
LED compatible.

Size:
